Dear Hiring Manager,

I am writing to express my interest in opportunities within your organization. I am currently graduate of the Bachelor of Engineering Technology (Honours) in Mechatronics at the University of Sri Jayewardenepura, with a strong interest in automation and industrial systems.

Throughout my academic journey, I have developed solid knowledge in embedded systems, PLC programming, motor control, control systems, CAD designing, and industrial automation. I have hands-on experience through projects such as the design and development of an Automated Guided Vehicle (AGV) for indoor material handling and embedded control implementation for a Delta Robot system.

Additionally, I completed a six-month internship at CBL Group, where I gained practical experience in troubleshooting mechanical and automation systems, interpreting technical drawings, working with industrial tools, and maintaining safety standards in a manufacturing environment. This experience enhanced my technical competence and professional discipline.

I am highly motivated, quick to learn, and capable of working both independently and as part of a team. I am confident that my technical background, practical exposure, and dedication will allow me to contribute positively to your organization while further developing my skills.

I would welcome the opportunity to discuss how I can add value to your company. Thank you for considering my application.

Yours sincerely,

HESHALA MADHUWANTHA
